

## SCIENTIFIC PUBLICATIONS

- The olfactory lobes, forebrain and habenular tracts of Acipenser. Zoological Bulletin, Vol. 1, 1898, pp. 221-241, 5 figures.
- Hind brain and cranial nerves of Acipenser. Anat. Anzeiger, Vol. 14, 1898, pp. 580-602, 12 figures.
- Giant ganglion cells of Catostomus and Coregonus. Journal of Comparative Neurology, Vol. 10, 1900, pp. 375-381, 2 plates.
- Das Gehirn and die Cranialnerven der Anamnier. Ergebnisse d. Anat. u. Entw., Vol. 11, 1901, pp. 973-1112, 7 figures.
- The course of the blood flow in the Lumbricus. American Naturalist, Vol. 36, 1902, pp. 317-328, 3 figures. (With Sarah W. Johnson)
- The brain of Petromyzon. Journal of Comparative Neurology, Vol. 12, 1902, pp. 1-86, 8 plates.
- The brain of Acipenser. Zool. Jahrbuch., Vol. 15, 1901, pp. 1-204, 12 plates (84 photos).
- An attempt to define the primitive functional divisions of the central nervous system. Journal of Comparative Neurology, Vol. 12, 1902, pp. 87-106, 2 figures.
- The origin of the heart endothelium in amphibia. Biological Bulletin, Vol. 5, 1903, pp. 28-34, 4 figures.
- Movements of the cerebro-spinal fluid in Cryptobranchus. Science n.s., Vol. 17, 1903, p. 530.
- On the blood vessels, their valves and the course of the blood in Lumbricus. Biological Bulletin, Vol. 5, 1903, pp. 74-84.
- The radix mesencephalica trigemini. The ganglion isthmi. Anat. Anzeiger, Vol. 17, 1905, pp. 364-379.
- The morphology of the vertebrate head from the viewpoint of the functional divisions of the nervous system. Journal of Comparative Neurology and Psychology, Vol. 15, 1905, pp. 175-275, 4 plates.
- The cranial and spinal ganglia and the visceromotor roots in amphioxus. Biology Bulletin, Vol. 9, 1905, pp. 112-137, 7 figures.
- The Nervous System of Vertebrates (a textbook of comparative neurology). P. Blakiston's Sons & Co., Philadelphia, 1906, 370 pages, 180 figures.
- The cranial nerve components of Petromyzon. Morph. Jahrbuch, Vol. 34, 1905, pp. 149-203, 1 plate, 18 figures.
- Additional notes on the cranial nerves of petromyzonts. Journal of Comparative Neurology and Psychology, Vol. 18, 1908, pp. 569-608, 29 figures.

- On the significance of caliber of the parts of the neurons in vertebrates. Journal of Comparative Neurology and Psychology, Vol. 18, 1908, pp. 609-618.
- The methods of functional neurology. Anatomical Record, Vol. 1, 1908, pp. 210-212.
- Note on the presence or absence of the glossopharyngeal nerve in myxinoids. Anatomical Record, Vol. 2, 1908, pp. 233-239.
- A new method of brain dissection. Anatomical Record, Vol. 2, 1908, pp. 345-358.
- The central nervous system of vertebrates. Ergebnisse und Fortschritte der Zoologie, Vol. 2, 1909, pp. 1-170, 103 figures.
- The morphology of the forebrain vesicle in vertebrates. Journal of Comparative Neurology, Vol. 19, 1909, pp. 457-539, 44 figures.
- The radix mesencephalica trigemini. Journal of Comparative Neurology, Vol. 19, 1909, pp. 593-646, 32 figures.
- A note on the forebrain of Chimaera. Anatomischer Anzeiger, Vol. 36, 1910, pp. 233-242.
- The problem of the correlation of mechanisms. Anatomical Record, Vol. 4, 1910, pp. 81-92, 1 figure.
- The evolution of the cerebral cortex. Anatomical Record, Vol. 4, 1910, pp. 143-166, 20 figures.
- A comment upon recent contributions on the brain of Petromyzon. Anat. Anzeiger, Vol. 37, 1910, pp. 153-194, 9 figures.
- The limit between ectoderm and entoderm in the mouth and the origin of taste buds. American Journal of Anatomy, Vol. 10, 1910, pp. 41-67, 21 figures.
- The telencephalon of selachians. Journal of Comparative Neurology and Psychology, Vol. 21, 1911, pp. 1-113, 85 figures.
- The telencephalon of ganoids and teleosts. Journal of Comparative Neurology, Vol. 21, 1911, pp. 489-591, 99 figures.
- Upon the morphology of the forebrain in fishes. Anatomischer Anzeiger, Vol. 40, 1912, pp. 531-540, 6 figures.
- The telencephalon in cyclostomes. Journal of Comparative Neurology, Vol. 22, 1912, pp. 1-70, 41 figures.
- On the teleostean forebrain. Anatomical Record, Vol. 6, 1912, pp. 423-438, 3 figures.
- The nervus terminalis in reptiles and mammals. Journal of Comparative Neurology, Vol. 23, 1913, pp. 97-120, 12 figures.

The morphology of the septum, hippocampus and pallial commissures in reptiles and mammals. *Journal of Comparative Neurology*, Vol. 23, 1913, pp. 371-478, 93 figures.

The nervus terminalis in man and mammals. *Anatomical Record*, Vol. 8, 1914, pp. 185-198, 9 figures.

A tractus olfacto-tegmentalis in the human fetal brain. *Journal of Comparative Neurology*, Vol. 25, 1915, pp. 283-290, 9 figures.

The cell masses in the forebrain of the turtle *Cistudo carolina*. *Journal of Comparative Neurology*, Vol. 25, 1915, pp. 393-468. 60 figures.

Evidence of a motor pallium in the forebrain of reptiles. *Journal of Comparative Neurology*, Vol. 26, 1916, pp. 475-479, 1 figure.

The development of the dorsal ventricular ridge in turtles. *Journal of Comparative Neurology*, Vol. 26, 1916, pp. 481-503, 27 figures.

Neutral red as a cell stain for the central nervous system. *Anatomical Record*, Vol. 11, 1916, pp. 297-298.

Method of mounting sections in gelatin. *Anatomical Record*, Vol. 12, 1917, pp. 309-311. (With Edna G. Dyar)

Further contributions to the study of the evolution of the forebrain. *Journal of Comparative Neurology*, Vol 35, 1923, pp. 337-481, 132 figures.

Further contributions to the study of the evolution of the forebrain. V. Survey of forebrain morphology. *Journal of Comparative Neurology*, Vol. 36, 1923, pp. 143-192, 32 figures.

*A great deal of the biographical information on J. B. Johnston was abstracted from a summary of Dr. Johnston's career prepared by Prof. Rasmussen of the Anatomy Department, University of Minnesota, 1951, in connection with the dedication of Johnston Hall. This summary, as well as the partial list of publications, was kindly furnished by personnel at the University Archives.*
