# Brain, Behavior and Evolution

Editor-in-Chief

G.F. Striedter, Irvine, Calif.

*Brain, Behavior and Evolution* is a journal with a loyal following, high standards, and a unique profile as the main outlet for the continuing scientific discourse on nervous system evolution. The journal publishes comparative neurobiological studies that focus on nervous system structure, function, or development in vertebrates as well as invertebrates. Approaches range from the molecular over the anatomical and physiological to the behavioral. Despite this diversity, most papers published in *Brain, Behavior and Evolution* include an evolutionary angle, at least in the discussion, and focus on neural, rather than purely behavioral, mechanisms or phenomena. In addition to original research reports, the journal contains review articles that provide critical overviews of current topics in evolutionary neurobiology.
